

Officers' Mess Tennis Court c.1937 25
NLA – 487.69m²

Grass tennis court with perimeter hurricane fencing

with small undercover brick shed for facilities and outside BBQ area

Open Shed 27
NLA – 38.4m²

Small timber-framed shed with monopitch corrugated galvanised steel roof. The shed stands within a pipe frame and chainmesh compound.

Gardeners' Shed c.1994 28
NLA – 82m²

Cream steel framed colour bond shed with 3 separate roller doors in one large area with overhead lighting and separate room at the northern end.

ARMCO Missile Launching System Shed & Garage c.1956 34
NLA – 527m²

Steel framed, corrugated Colorbond clad semi-cylindrical structure (Nissan Hut). The building has a central galvanised steel roller at its west end. Panels of Alsinite in the curved roof sheeting and end wall cladding admit light into the interior. It contains 2 small workshops.

Air Defence Lecture Room & Store c.1956-1962 34A
NLA – 144.3m²

Steel framed demountable shed. The roof is gabled and clad with galvanised Colorbond (steel). The building stands on a concrete slab floor. The side walls are divided into bays with pairs of louvre framed windows, which provide for adjustable ventilation over the full height of the walls and the length of the building. The roof at the southern end oversails the walls by one full bay providing a covered shelter on the south side.

RAEME Repair & Parts Section/ Wood & Metal c.1956-1962 34B
NLA – 144.3m²

Steel framed demountable shed supplied to the Defence Forces by Lysaghts. The roof is gabled and clad with galvanised Colorbond (steel). The building stands on a concrete slab floor. The side walls are divided into bays with pairs of louvre framed windows, which provide for adjustable ventilation over the full height of the walls and the length of the building. The roof at the southern end oversails the walls by one full bay providing a covered shelter on the south side.

Regional Training Wing Lecture Room c.1947 40
NLA – 141m²

Standard NSW Government Architect designed prefabricated (demountable) classroom with steel frame, aluminium window frames, external wall panelling and flat metal deck roof.

Model Room c.1960 41
NLA – 112m²

Steel framed demountable shed supplied to the Defence Forces by Lysaghts. The roof is gabled and clad with galvanised sheet cladding in the same bold profile as the walls. The building stands on a concrete slab floor. The side walls are divided into bays with pairs of louvre framed windows, which provide for adjustable ventilation over the full height of the walls and the length of the building.

Regional Training Wing Lecture Room c.1980 42
NLA – 89.2m²

Small prefabricated demountable building of stud frame construction with monopitch metal deck roof erected on concrete piers. Windows are aluminium frame and glazing in pre-coloured steel. Internal linings are standard pre-coated sheeting.
