

Fun for young adventurers!

B I N G O

Native plants and animals

Let's play! As you explore this area, sticking to the walking tracks, look out for the plants and animals pictured below.

Tick the box next to any you find. If you get 4 in a row (down, across or diagonally), yell 'BINGO'!

Hi, I'm Billy the
Black Cockatoo! Squawk!

North Head Sanctuary
is home to a vibrant community
of native plants and animals (like me).

More than 650 different plants grow here.
This vegetation supports echidnas, reptiles, frogs,
insects... and more than 100 bird species!

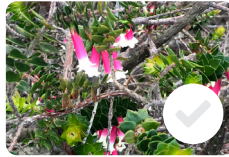

Oh, and let's not forget the endangered
population of long-nosed bandicoots or
the other locally extinct critters that
have been reintroduced.

Button grass

Coast banksia

Fuchsia heath

Flannel flower

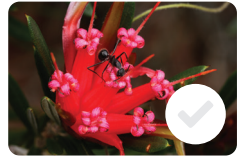

Grass tree

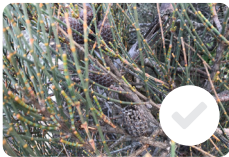

Grey spider flower

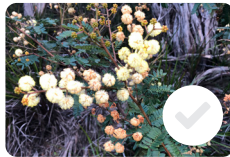

Heath leaved banksia

Mountain devil

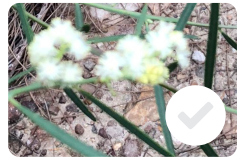

She-oak

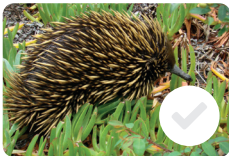

Sunshine wattle

Wallum banksia

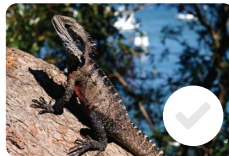

Sweet wattle

Echidna

Eastern blue-tongue
lizard

Eastern water dragon

New Holland honeyeater

MINI QUIZ!

What does 'flora' mean?

What does 'fauna' mean?

Don't know? Ask our friendly visitor centre volunteers – they'll share the answers with you!

Sometimes the animals around here are easier to hear than they are to see.

Write down any animals you hear... and share what sounds they make!

(For example, if North Head Sanctuary was a farm you might say.... PIG and OINK!)

Once you've explored, have a think about your favourite plant or animal at North Head Sanctuary. Draw it here!
